

| Agenda Item            | Discussion  | Decision/Action/Goal | Assigned to | Due |
|------------------------|---|----------------------|-------------|-----|
| Review/Approve minutes |   |                      |             |     |
| Review action items    |   |                      |             |     |
| Presentation           | This month's presenter was Gina Hodges with Munson Healthcare Manistee Hospital Radiology Department speaking about 3-D Tomosynthesis           |                      |             |     |
|                        | We discussed the new 3-D Tomosynthesis machine for breast screening   |                      |             |     |
|                        | Discussed the difference between 2-D and 3-D images   |                      |             |     |
|                        | Discussed key points of how in depth 3-D images are compared to 2-D images and the increased accuracy detection with 3-D testing                |                      |             |     |
|                        | We talked about the process for ordering 3-D Tomosynthesis, insurance coverage, coding & billing, and out of pocket expense for some insurances |                      |             |     |
|                        | Gina concluded with some time for questions.  |                      |             |     |
|                        | See attached slides   |                      |             |     |
|                        |   |                      |             |     |
| Adjourn                | The meeting was adjourned at 12:55 p.m.   |                      |             |     |
| Next Meeting           | September 20, 2017  |                      |             |     |
