CPC+ Update

- Participation in the CPC+ synergistic multi-payer opportunity has been a catalyst for BCBSM to consider what's next in BCBSM's evolving value-based payment model. In our original application to CMS, we indicated that Track 1 reimbursement would be our current VBR opportunities, but that practices would have to meet our program criteria for each VBR. We also indicated our Track 2 reimbursement would be an additional 5% VBR that would likely have additional criteria related to delivering care management to highly complex patients and delivering telehealth services.
- We only recently received the list of practitioners accepted into CPC+. It is evident that many of our most advanced practices will not be in CPC+, so we have revised our strategy. Given the need to continue to advance practice transformation across the state, **BCBSM VBR opportunities available to CPC+ practices will also be available to all PGIP practices.** Criteria for the advanced practice VBR are currently under development and will be announced first quarter 2017. To give practices time to meet the advanced practice criteria (and also due to lead time associated with internal administrative processes), we plan to implement the new VBR in 2018.

NPOINC.ORG

Update

- Tying outcomes to PCMH
 - 10 ER visits
