

Automatic Reweighting of the MIPS PI Performance Category for Certain Eligible Clinicians (ECs)

The following types of MIPS ECs qualify for **automatic** reweighting (no application needed):

Physician Assistants

Nurse Practitioners

Clinical Nurse Specialists

Certified Registered Nurse Anesthetists

Ambulatory Surgical Center (ASC)-based MIPS ECs

Hospital-based MIPS ECs

Non-patient facing clinicians (lack face-to-face interactions with patients)

Physical Therapists*

Occupational Therapists*

Speech-language Pathologists*

Audiologists*

Clinical Psychologists*

Registered Dietitians or Nutrition Professionals*

* New MIPS Eligible Clinician types in 2019

These ECs can still report PI data if desired. If data is reported, it will be scored accordingly and will override this automatic reweighting. If data is not submitted, the PI performance category weight will be added to the Quality performance category, leaving the PI category weight at 0%.
