

Reporting Requirements for Non-ACO Participants

MIPS Eligible Clinicians who are NOT part of either the Trillium or Northern Michigan Health Network (NMHN) ACO, and who are NOT otherwise excluded from MIPS (e.g., by participation in an Advanced APM, such as CPC+, by meeting Low-Volume Threshold criteria, or by having been granted a hardship exemption) should plan on reporting MIPS data for the following Performance Categories:

1) Quality

2) Promoting Interoperability (PI)*

*No points are received for completing a Security Risk Assessment (SRA), but completing an annual SRA is still mandated!

3) Improvement Activities (IA)**

**Full credit for the IA Performance Category is granted to providers in PCMH-designated practices; Check the “PCMH-Designation” box when attesting

4) Cost***

*** No additional reporting is required for the Cost Performance category, as data is pulled from claims
