

2020 HEDIS® Advanced Illness and Frailty Exclusions Guide

In 2018, the National Committee for Quality Assurance allowed additional exclusions to Healthcare Effectiveness Data and Information Set, or HEDIS®, star measures for patients with advanced illness and frailty.

Services measured by NCQA may not benefit older adults with limited life expectancy and advanced illness. Also, unnecessary tests or treatments could burden these patients or even be harmful. NCQA wants providers to focus on appropriate care for their patients.

BILLING CODES

This guide includes:

- Billing codes for advanced illness exclusions and dementia medication descriptions and names
- Billing codes for frailty exclusions

Remember that use of HEDIS® approved billing codes can substantially reduce medical record requests for HEDIS data collection purposes.

STAR MEASURE EXCLUSION CRITERIA

Codes must be billed in the measurement year or the year prior to exclude the patient from the star measures in the table below.

Patients 66 and older can be excluded from these measures if they have BOTH advanced illness and frailty	Patients 66-80 can be excluded from these measures if they have BOTH advanced illness and frailty	Patients 67-80 can be excluded from these measures if they have BOTH advanced illness and frailty	Patients 81 and older can be excluded from these measures if they only have frailty
